# BLOCKX *Pastels*

J. BLOCKX FILS SA · B-4550 NANDRIN · BELGIUM · [www.blockx.be](http://www.blockx.be) · [info@blockx.be](mailto:info@blockx.be)

Pastel, along with oil and watercolor, completes the painter's traditional trilogy of expression.

Blockx pastel, ready for use, is made of pure pigment in the strongest company tradition. Soft, velvety and of superb tinting strength, it draws on any surface, although best suited for appropriate pastel paper.

Wrapped individually, the sticks are clean and their wrapper is easily taken off.

Achieved with modern chemistry, yet still handmade, they are watersoluble and light-fast, guaranteed by four generations of chemists.

More than 200 bright, luminous and fresh tints are available.

Tra i mezzi di espressione artistica tradizionale, insieme al colore ad olio e all'acquerello, il pastello rappresenta senza dubbio il terzo elemento della trilogia del pittore.

Costituiti da pigmento puro in forma di bastoncino con tutta la cura tradizionalmente propria dei prodotti BLOCKX, i pastelli sono sempre pronti all'uso.

Teneri, vellutati e con grande potere coprente, essi scrivono su tutte le superfici, ma è sulle carte speciali che rendono al meglio.

Imballati singolarmente, sono facili e puliti da maneggiare e la loro identificazione è assai semplice.

Risultato della chimica moderna, eppure interamente fabbricati a mano, i pastelli sono proposti in 204 tinte.

Vivaci, luminosi, freschi e diluibili anche con l'acqua, sono resistenti alla luce e garantiti dall'esperienza di quattro generazioni di chimici.

Entre los medios de expresiones tradicionales, el pastel constituye sin duda alguna con el óleo y la acuarela, la trilogía del artista pintor.

Puro pigmento comprimidos en barras en la más pura tradición de los productos BLOCKX, están siempre dispuestos a ser utilizados.

Tiernos, aterciopelados y de un gran poder cubriente, escriben en todo soporte. Es sin embargo sobre papeles especiales que dan el mejor de ellos mismos.

Embalados individualmente, su manipulación es de lo más cuidadosa y su identificación se quita sin dificultad.

Resultado de la química moderna, pero sin embargo completamente fabricados a mano, 204 tonos nos son propuestos.

Vivaces, luminosos, frescos, igualmente diluibles con agua y perfectamente sólidos a la luz, son garantizados por cuatro generaciones de químicos.
